

HYDROTHERAPY – Swimming Pool

Our 10' X 16' indoor heated resistance pool is very popular! Dogs can paddle around at their leisure in the 86 degree water or have a high intensity, low impact work-out swimming against the resistance current! We have used the pool for recovering post-operative orthopedic patients,

as well as neurological patients, arthritic or geriatric dogs, overweight dogs on a weight lose program, and conditioning canine athletes. We have also had success using the pool to help field dogs overcome training issues in the water!
